CORRECT RENDITION OF FORM T-56 REPORTS

In connection with a recent compilation of certain statistical data regarding the use by bureau employees of their personally owned cars on a mileage basis, attention was drawn to the fact that many forms T-56, from which the record was compiled, were incorrectly and incompletely rendered.

This report is intended primarily to show the cost per mile to the owner to operate his car on official business, and although it was adopted several years ago, the bureau is still of the opinion that it is very nearly ideal for that purpose when it is completely and correctly rendered; that is to say, when all information called for is correctly shown. The only spaces which may be left blank without vitally affecting the accuracy of the report for statistical purposes are Monthly allowance by bureau, \$-----; Hours used, and Counties where travel performed.

It is presupposed that an employee purchases a car for his personal use, and incidentally uses it for official business. In arriving at the cost, therefore, such items as insurance, license plates, garage rent (at official station) etc., should not be included as Other expense, under the heading, Cost of maintenance, for the reason that such expense would be incurred regardless of the fact that the car is used on official business. Payment to an employee at a mileage rate for use of his personally owned car is based on the theory of making the employee financially whole for any additional expense by reason of operating his car for the Government, and not to make him whole for the entire expense of operation for all purposes.

The following are some of the most glaring errors that have been noted: One employee indicated 132 miles traveled (official) at a total cost of \$132. No personal mileage was indicated. Miles run to date on one employee's report showed 16,600 miles, and he indicated depreciation for that month as \$166. Some employees showed, for example, 500 miles run on 150 gallons of gasoline. In many instances, the data indicated that the car was being operated for 1, 2, or 3 cents per mile.

Form T-56 reports will be examined more carefully in the future, and those not rendered correctly as indicated above will be returned for completion.

PRESS CLIPPINGS REQUESTED

To obtain a more adequate press-clipping service for the bureau and for the department as a whole, employees are requested to forward promptly to the chief of the bureau any press items they may see pertaining to the work of the bureau or to other branches of the department. Keeping department workers fully informed of what the press is publishing about various branches of official work is highly desirable.

The clippings likely to be most useful are those found in newspapers, agricultural journals, trade publications, magazines, or other periodicals, and employees are reminded that the department is interested in the entire field of agriculture and allied fields, such as forestry, good roads, and other lines of work covered by the department's activities.

It is requested that you simply clip the items, indicate the name of the publication from which taken and the date of issue, and forward the items to the chief of the bureau. No letter of transmittal is necessary. For convenience Form A-2 may be used. Some duplication of items will result, of course, but in the case of notices affecting the work of more than one branch of the department, this will be advantageous. The cooperation of all employees is earnestly requested in the development and maintenance of this service.
